4 x ± 1 kg TR:COT:01:####

4 x ± 28 kg TR:COT:02:####

Description:

Nano Coat is a two component colour infused and breathable sealer that provides long lasting protection against damage from water, oil, grease, UV light, corrosion, graffiti and other contaminants. Applicable to both absorbent (stone, wood) and non-absorbent (metal, plastic, painted surfaces) substrates, the technology offers substantial easy-to-clean properties due to infused nanotechnology additives and innovative nano-manufacturing processes. Nano Coat treatments are specifically designed for heavy-duty industrial environments. Note - no primer required.
