

NANOCOAT CLEAR

PRESERVES AND PROTECTS AGAINST WATER, OIL & FATS

NanoCoat Clear:

Is a two component transparent sealer [applied as a single coat once components are mixed] that provides long lasting protection against damage from water, oil, fats, grease, UV light, corrosion, graffiti and other contaminants.

Applicable to both absorbent (stone, wood) and non-absorbent (metal, plastic, painted surfaces) substrates, the technology offers substantial easy-to-clean properties due to infused nanotechnology additives and innovative nano-manufacturing processes. With both matte and glossy finishes, the Nano Coat treatments are specifically designed for heavy-duty industrial environments.

NOTE: Primer may be required when treating absorbent surfaces.

Areas of Application:

Pipeline Exterior - Metallic Reservoirs for Storage - Underbellies of Industrial Fleet Vehicles
Heavy Hauler Storage Containers

Where are these Materials Manufactured?

MFS Technologies Ltd. manufactures and globally distributes ready-to-use and concentrated nanotechnology surface coatings, nano-enhanced paint systems, manufacturing additives and custom formulations. Boasting a product breadth and depth of over one hundred and fifty variants, MFStek offers a wide range of nano-materials and environmentally responsible industrial chemicals, packaged and diluted for maximum sustainability and compatibility.

NanoCoat Clear comes in one pint can plus a smaller can for the hardener. The product is applied with a sprayer to create a coating 3-5 microns thick. Dry to touch time is 4 hours and dry complete is 8 hours. The product is effective down to -20C and up to +150C. Larger size containers are also available. Freight is F.O.B. Laval, Quebec. Local customs charges, taxes, etc are also the responsibility of the buyer. May cause eye and skin irritation during application so eye protection and gloves are recommended.
